## The Merrion Centre, Leeds

The Merrion Centre Leeds acquisitioned Lite Ltd to design a festive lighting scheme showing elegance with a modern twist. With this remit, our design team worked together to create a mix of traditional gold's and silvers with a contemporary gold leaf detailing on various pieces used throughout the scheme. Large hanging 3D displays imposed themselves in areas around the centre, with gold leaf detailing, animated warm MiniLEDs, and rope lighting, with

The 2D golden banners continuing the theme with added falling light, giving subtle animation throughout the centre.

In the main atrium, an amazing 25M x 25M shower of golden lighting was designed using 50 x 7M curtains and 63,000 LEDs, which created a backdrop of light for the Bespoke high gloss 3D "Merrion Christmas" display. Guiding people through the main entrance to the centre, was a stunning 3D 5M golden bow, consisting of High shine golden carpet, with twinkling lighting throughout.

To finish the scheme, we added a stunning 8M 3D natural looking tree, full with twinkling gold lighting, which has been proved to be a hit on the Centre's social media sites.
